Hi Jason,
Thank you for reaching out on this, and it's good to know that you are starting work on this assessment.
I took a look in my files, and didn't immediately locate the study you reference below, so I'm looping in the OEHHA toxicologists who were involved in the review of this chemical. I think they may have the study.
It might also be good to schedule a conference call to discuss the (admittedly quite thin) data.
Could I help to set up a call for some time in the next week or so?
Best wishes
-Gina

Good afternoon Gina,

We spoke briefly at the EPA's CSS SAB meeting last Fall re: para-Chlorobenzene sulfonic acid (p-CBSA). I know you are terribly busy so I am sorry to bother you but is there any chance you could send us the original study that was used in OEHHA's 2015 p-CBSA assessment. The citation is as follows:

American Biogenics Corporation (1985). Twenty-eight day oral (gavage) study in albino rats using A-100 (4-Chlorobenzenesulfonic acid). Decatur, IL.

Thank you Gina
